Our Values

Water is vital to the security of human health and diverse biological ecosystems on which all life depends. A clean, fresh, and reliable water supply is essential to community prosperity, crop and livestock nourishment, and successful operation of businesses and industry.

Maintaining an adequate supply of clean water with changing conditions and ever-increasing demands represents a significant challenge. Ensuring sustainable reliable access to good quality water is dependent on the collaborative efforts of government agencies, communities, agriculture, and industries.

Our Guiding Principles

Constellation seeks to be a good steward of water by:

- Understanding our impacts on water resources in the communities in which we operate.
- Continuously improving our management of water resources, preventing pollution, and complying with all applicable water use laws and regulations.
- Engaging local and other relevant stakeholders on important water issues, including those related to operational changes, development of strategic plans, or public policy advocacy.
- Collaborating with communities and other interested parties to address opportunities for protecting and enhancing watershed resources.

Our Commitment

Constellation is committed to operating its businesses in a socially responsible, sustainable manner, which includes the preservation and protection of water resources. Our policy supports this effort by:

- Establishing annual and long-term water management goals.
- Protecting aquatic species and habitats.
- Working to improve water efficiency and reduce consumptive use across our operations.
- Treating the water that we discharge effectively.
- Advocating for improved water resource policies and protective measures.
- Integrating water resource considerations into the lifecycle of operations, products, and services.

- Partnering with our vendors and suppliers to avoid, mitigate and improve water use impacts.
- Providing high-quality drinking water to our employees, contractors and all who visit our sites.

This policy is endorsed by the Constellation Sustainability Council.
