

Priority Sustainable Development Goals

We continue to align our business with global sustainability initiatives, in particular, the UN Sustainable Development Goals (SDGs). Constellation’s business and sustainability activities indirectly address nearly all 17 goals; however, we focus on five priority SDGs that most directly align with our business strategy. To understand the primary actions that Constellation is taking to progress the achievement of the SDGs and where you can find additional information in this report, please refer to the tables below.

Strategic Principle: Power America’s Clean Energy Future			
UN SDG	Overview of Strategic Principle	Goals and Initiatives	Report Sections (2022)
 <p>Goal 7: Affordable and Clean Energy Ensure access to affordable, reliable, sustainable and modern energy for all.</p>	<p>Clean, Safe and Reliable Energy As the largest supplier of clean power in the U.S., we are committed to leading the charge against the climate crisis. Our clean energy supply is available when customers need it 24 hours a day, 7 days a week. Our commitment to operational excellence and safety is industry-leading, with our capacity factors and energy capture setting the industry standard. We take every precaution to minimize health and safety hazards and exposure.</p> <p>Climate Change Mitigation, Adaptation We recognize that while we can play a role in mitigating the climate crisis, our business will also need to make investments to adapt, build resiliency and support the longevity of our assets. Constellation is managing our operations to mitigate the impacts of the climate crisis on our business, the customers we serve and the communities we operate within, including responsible water use and protecting the habitat and biodiversity.</p>	<p>Goals</p> <ul style="list-style-type: none"> Achieve 100% carbon-free generation by 2040, with an interim goal of 95% by 2030. Reduce operations-driven emissions by 100% by 2040, compared to 2020, with an interim goal of 65% reduction by 2030. Reduce methane emissions by 30% by 2030, compared to 2020, aligning Constellation with the Global Methane Pledge. <p>Initiatives</p> <ul style="list-style-type: none"> Operating the nation’s largest fleet of clean energy plants safely and reliably with industry-leading capacity factors and world class outage execution. Constellation plans to extend the operation of its nuclear plants to combat the climate crisis in the upcoming decades. Providing 24/7 clean generation capable of powering more than 14.9 million homes. Serving more than two million retail customers, including approximately three-fourths of the <i>Fortune 100</i>. 	<p>About Constellation > Our Approach to Sustainability > Reducing Emissions</p> <p>Clean Energy > Clean, Safe and Reliable Energy</p>
 <p>Goal 9: Industry, Innovation and Infrastructure Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.</p>			
 <p>Goal 13: Climate Action Take urgent action to combat climate change and its impacts.</p>			

Strategic Principle: Provide Energy and Sustainability Solutions for Customers

UN SDG	Overview of Strategic Principle	Goals and Initiatives	Report Sections (2022)
 <p>Goal 11: Sustainable Cities and Communities Make cities and human settlements inclusive, safe, resilient and sustainable.</p>	<p>Advocate for Climate and Clean Energy Policies that Address the Climate Crisis Constellation’s business is subject to a wide range of government laws and regulations. The Constellation business has a long history of engaging with policymakers to find solutions that support the bettering of our environment and our business interests, provide more value to customers and create desirable outcomes for stakeholders.</p>	<p>Goals</p> <ul style="list-style-type: none"> Provide 100% of our C&I customers with customer-specific information on their carbon impact for facilities contracting for power and gas supply from Constellation (including mitigation opportunities that include 24/7 clean electric use) by the end of 2022. Increase clean power supplied to customers through Constellation Offsite Renewables (CORe) products. 	
 <p>Goal 13: Climate Action Take urgent action to combat climate change and its impacts.</p>	<p>Clean Customer Transformation We are committed to supporting our customers in shaping and achieving their sustainability goals. Achieving our purpose will require partnerships with customers across C&I sectors, municipalities and other innovative businesses to scale our impact. From products that supply our customers with clean power when they need it, to transformative solutions to integrate clean fuels, we will continue to innovate in partnership with our customers.</p>	<p>Initiatives</p> <ul style="list-style-type: none"> Engaging with policymakers to find solutions that support improvements to the environment and our business interests, provide more value to customers and create desirable outcomes for stakeholders. Leading the transition to a clean energy economy through clean fuels like hydrogen and expanded electrification. 	<p>About Constellation > Our Approach to Sustainability > Reducing Emissions</p>
 <p>Goal 7: Affordable and Clean Energy Ensure access to affordable, reliable, sustainable and modern energy for all.</p>		<ul style="list-style-type: none"> Expanding sustainability solutions to help more C&I customers meet their clean energy goals, with a focus on 24/7/365 carbon accounting. Supporting emissions reductions for retail natural gas customers through offsets and Renewable Natural Gas (RNG). 	<p>Clean Energy > Clean, Safe and Reliable Energy</p> <p>Clean Energy > Policy Engagement and Advocacy</p>

Strategic Principle: Expand America's Largest Fleet of Clean Energy Centers

UN SDG	Overview of Strategic Principle	Goals and Initiatives	Report Sections (2022)
 <p>Goal 9: Industry, Innovation and Infrastructure Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.</p>			
 <p>Goal 7: Affordable and Clean Energy Ensure access to affordable, reliable, sustainable and modern energy for all.</p>	<p>Invest in New and Innovative Solutions Partnerships with our customers, suppliers, universities, governments, national labs and startups are essential to enable the clean energy future. We support the commercialization pathways to enable the technology to deliver value and help us solve the intergenerational challenges before us. We cannot achieve our climate goals without enabling technology innovation both within and outside the company.</p> <p>Operating Our Existing Nuclear Plants as Clean Energy Centers At Constellation, we envision our nuclear power fleet operating as innovative clean energy centers that will not only satisfy the growing demand for clean and flexible energy but also, in certain instances, produce clean hydrogen and power DAC.</p>	<p>Goals</p> <ul style="list-style-type: none"> Facilitate the future technologies and business models needed to drive the clean energy economy and improve community health and welfare. <p>Initiatives</p> <ul style="list-style-type: none"> Operating our nuclear sites as clean energy centers. Acquiring new clean energy assets and repowering existing renewables. Extending nuclear-operating licenses and exploring power uprates. Investing or partnering in innovative technologies, including advanced nuclear, will be needed to fully address the climate crisis. Investing in companies exploring innovative energy technologies and business models through Constellation Technology Ventures. Piloting solutions like NET Power, hydrogen and RNG that have the potential to decarbonize natural gas generation. 	<p>Clean Energy > Innovation and Technology Enablement</p>
 <p>Goal 13: Climate Action Take urgent action to combat climate change and its impacts.</p>
